

A scatter plot with blue circular markers on a white background. The x-axis is labeled from 0.0 to 0.8 with major ticks every 0.2. The y-axis is unlabeled but has a visible range from approximately -0.1 to 0.5. The data points form a large, roughly circular ring centered at approximately (0.5, 0.0) with a radius of about 0.4. There is a smaller, more complex cluster of points at the top center of the ring, roughly between x=0.25 and x=0.6, and y=0.1 to y=0.4. This cluster appears to be a continuation or a separate set of points related to the main ring.
