

A blue line plot on a white background with a black border. The x-axis and y-axis both range from 0.0 to 1.0, with major tick marks and labels at 0.0, 0.2, 0.4, 0.6, 0.8, and 1.0. The plot shows a single, continuous blue line that forms a complex, irregular shape. The shape is mostly contained within the upper-left and central regions of the plot. It has a large, rounded upper-left portion, a smaller, more jagged protrusion on the left side, and several smaller indentations and protrusions along its lower and right edges. The line is smooth but follows a complex path, creating a shape that resembles a stylized map or a biological structure.
